

September 2011 Project of the Month

*“We love everything...We are so happy...The result is Priceless!”
Bill & Rosanne B. - Naperville, IL*

For this Project of the Month, *vision* is what brought this kitchen to fruition. Bill & Rosanne had been dreaming of an oversized kitchen with all the bells & whistles. They were looking for a kitchen that would be open and inviting and would allow them to enjoy time with friends and family. For several years Bill & Rosanne had tried to find a designer that could bring their dreams to life, but after several visits to the “big box stores” they returned home more confused and frustrated, because they felt no one was really listening to them, and as a result they repeatedly tabled their dream.

Greg Millen and the staff of Saint Joseph Cabinetry helped create for Bill & Rosanne the kitchen they had been dreaming of. They were able to transform the current layout of 3 separate rooms into an open concept of a big and versatile kitchen. In assessing the layout and the structure of the home, walls were removed and moved to create the open feeling and helped to create new work areas, storage, functionality and helped with traffic flow management. The outcome is an open floor plan with the kitchen and dining area incorporated together, an open flow into the family room, ample areas for preparing meals, loads of storage and plenty of room for entertaining friends, family and adorable grandkids.

Bill & Rosanne’s kitchen features a full overlay raised panel door with a shaker edge in beech wood, accented in a light but warm Sienna stain and highlighted with a rich chocolate glaze. Bells and whistles abound in this beautiful kitchen with oversized crown molding, a decorative wood hood complete with a pot filler, pullout spice racks, oversized pot and pan drawers, oversized plate drawers featuring a peg divider system and even a KitchenAid mixer stand built right into a cabinet.

Bill and Rosanne are so happy with the outcome and their choice of cabinetry and they both agree, “the cabinets are beautiful, well made and of excellent craftsmanship! In looking back on this project we are just thrilled with the outcome. From the beginning things were well planned out and everyone

that was involved was precise, professional and brought to the project great knowledge and skills. The result is Priceless!”
